LIVING IN A BUBBLE

Get modern living all wrapped up in the Gotjawal Cocoon House. Three years in the making, this curvaceous beachside condo in South Korea is designed to mimic the rolling topography of volcanic Jeju Island and nestles in lush, landscaped grounds. The 'cocoon space' at the centre of the property doubles up as a library and private gallery, while the rooms on either side are at different heights, creating a multi-dimensional effect. It will be finished this year. planningkorea.com

SPLASH OUT...

On a bateau bath made from antique brass. Smudges of lilac and indigo create a pretty, painterly flush on the exterior. £8,340. drummonds-uk.com
