Colour confident

Colour can completely transform your bathroom. Whether it's traditional or contemporary, introducing a bold new hue will give your space a distinctive edge...

64

The bathroom is one of the key rooms in the house where you can really inject your personality. Rather than choosing an all white scheme, splash out the colour and create a space that will brighten your mood every time you enter.

This isn't about painting walls (although that is always a cost effective, often simple solution if you like your existing suite), it is about thinking outside the box, making your bathroom space an exciting room that exudes character and charm. Consider different colours - yellow may not be top your list of favourite hues, however it can instantly brighten your room. A deep red will inject warmth in a stark white suite, while a green will radiate energy - perfect for those sluggish mornings.

Opposite page: The Tay freestanding double-ended roll top bath from Drummonds is shown here with an energetic red painted exterior. The cast iron vessel can be painted in a colour of your choice, or clad in copper or brass. From £3,750. drummonds-uk.com
