NEW RANGE

Miele has announced the introduction of its first ever range cooker collection. Launching in September 2017 the ranges will be available in two widths, 92cm (36") and 122cm (48"), and will feature the design, precision, functionality and controllability for which Miele is renowned, as well as catering for a host of cooking needs, producing restaurant style quality dishes at home. Benefiting from the fantastic usability of the current Generation 6000 appliances, this impressive Miele range cooker features M Touch controls and a motorised fascia for simple navigation at the swipe or scroll of a finger. The top has seven gas burners including a griddle and wok ring for quickly searing meats, charring vegetables and cooking pancakes. Underneath, the cooker offers a plethora of different options, including a standard oven, microwave oven and a gourmet warming drawer. The large 85L oven provides a versatile range of cooking programmes including intensive bake, a choice of grilling options, crisp function and fan plus, which is ideal for baking and roasting on different levels at the same time.

SMALL BUT PERFECTLY FORMED

Drummonds' new Bourne vanity basin is the perfect answer to small bathrooms and cloakrooms needing an impressive - but compact - basin. The smallest basin which Drummonds have ever designed, it is made with exactly the same attention to traditional manufacturing and materials which distinguishes their larger models. Shown here wall-mounted with a hidden brass bracket, the Bourne can also sit on a vanity surface or be integrated with a cabinet.

The Usk bateau bath in antique brass, an iconic design and a cosy one which is great for sitting up or reading. The hand poured cast iron achieves a superior thickness and fused with vitreous enamel ensures durability. **Drummonds**

Keep things clean and simple with the Clyde bath from **Drummonds** in a handpainted finish.

Available in a variety of colours, the Squaro Edge 12 bath from **Villeroy & Boch** is sure to become the highlight of your bathroom. The unique collection has an unusual design, incorporating a bath rim of only 12mm and thanks to its inner depth of 45 cm it's very good at conserving water.
