*HOME takes a tour of Kate Moss's bathroom, which features the model's own wallpaper design*

**H**andmade using traditional manufacturing techniques, Drummonds' splendid Double Lowther Vanity forms the magnificent centerpiece of Kate Moss's bathroom.

The brassware of the stand and taps is cast using the classic lost wax process and the white china basins are made in English clay, hand glazed and hand-finished. Highly figured Arabescato marble underlines the sheer scale and luxury of this piece.

To partner the Lowther, Moss chose a freestanding, double-ended Spey bath with a hand-painted exterior. This is just one of Drummonds' many cast iron bath designs, each of which takes several weeks to make in a series of craft processes beginning with casting the molten iron and completed by dry fit enameling and custom exterior finishing. **Q**
