

BASINS

Bottle Trap For Basin

The finishing touches to any basin are important. We have put our fittings for this bottle trap with a wall covering escutcheon together so that you have the Drummonds quality under the basin. This enables all first-fix pipework (copper/ PVC) to be finished from the wall. The cover then allows for a connection to the brass pipe and fittings under the vanity. A great solution which allows for a high-quality finish to the collection.
