

The Collection 2026

Made By Hand To Last A Lifetime

DRUMMONDS
LONDON · NEW YORK

“Drummonds Stands for:
Handmade, Classic, Quality.”

Drummond Shaw.

Drummond Shaw

FOUNDER

2026: ANOTHER YEAR OF EVOLUTION

This year's pricing and information guide presents the enduring quality of a Drummonds creation. Every cast iron bath, piece of lost-wax brassware, and vitreous china is a testament to British craftsmanship - designed not merely to furnish a bathroom - but to define it.

We are delighted to introduce the Hudson Collection, a new pinnacle of design resulting from our collaboration with New York's celebrated Pembroke & Ives.

As you browse, note our continuous improvements in range and certification, ensuring our timeless designs meet and exceed the standards of contemporary luxury. Our collection is an investment in unparalleled, handmade excellence. Drummonds' committed team of craftsmen keeps essential traditions and skills alive through their work today; we could not be prouder.

James Lentaigne
Managing Director, Drummonds

The Dreamers

Constantly evolving, our new collections are conceived in dialogue with the visionary designers shaping the contemporary interior. The traditional manufacturing techniques that underpin our mission are applied to timeless forms. Each step is considered and purposeful, seamlessly connecting our rich heritage to a future reimagined.

Susie Atkinson

Susie is renowned for award-winning interiors defined by intelligent colour, natural materials, and textural depth. Her reinterpretation of Drummonds' classic slipper bath is an elegantly proportioned luxurious statement.

Suzy Hoodless

Suzy Hoodless creates interiors defined by energetic contrasts, mixing eras, styles, and colour with confident originality. Her lighting and mirror designs are versatile, modern classics that bridge traditional and contemporary.

Martin Brudnizki

Founder of MBDS, Martin unites engineered functionality with artistic flair. His contemporary reinterpretation of traditional forms pairs seamlessly with Drummonds' craftsmanship, creating interiors that feel refined and characterful.

James Lentaigne

For nearly two decades, James has shaped Drummonds' creative direction, translating its traditional collections from original antiques while championing new collaborations with contemporary designers.

Steven Gambrel

Steven's New York practice is celebrated for interiors that balance architectural heritage with personal stories. His collection of strong geometric forms feels substantial and warmly nostalgic.

Marc Newson

Marc is simply one of the most influential designers of his generation, with a global portfolio spanning furniture, technology, and transport. His collection feels industrial with a rounded minimalism; iconic and tactile.

Nicola Harding

Nicola blends contemporary clarity with classical sensibilities, crafting interiors that feel elegant, comfortable, and quietly familiar. Her use of natural materials and layered textures cultivates harmony, warmth, and a connection to nature.

Pembroke & Ives

Francis Nicdao is the Chief Creative Officer at this leading New York design studio known for tailored, impeccably crafted interiors defined by clarity, comfort, and quiet luxury.

The Makers

A series of cathedral-like spaces in one modern complex, our factory houses three separate foundries; one for cast iron, brass, and clay china. From vast furnaces to busy workrooms, a team of 80 craftspeople keep skills alive from centuries ago. Combining these artisanal techniques with cutting-edge technologies, Drummonds has become simply the finest bathroom manufacturer in the world.

IRON

Drummonds' cast-iron foundry upholds the distinguished Victorian tradition of cast-iron bath production, where molten metal is expertly sand-cast, shot-blasted, dry-frit enamelled, and hand-polished. This meticulous process encompasses weeks of skilled craftsmanship.

BRASS

Employing the ancient art of lost-wax casting, our skilled sculptors craft intricate forms in beeswax, encased in a silica shell and filled with molten brass. Simultaneously, our engineers use state-of-the-art lathes and CNC milling technologies to perfect pipework. A team of artisans then meticulously polish, age, or plate the brass to one of our nine signature house finishes.

CLAY

English clay is hand-poured using the traditional slip-casting method, then air-dried, carefully smoothed, glazed, and furnace-fired. Drawing inspiration from traditional antique forms, each piece is re-engineered to meet modern plumbing standards. Our distinctive off-white glaze stands as a hallmark of exceptional quality.

Kate Moss' London Townhouse
Designed by Katie Grove Interiors and MMM Architects

Aldourie Castle, Scottish Highlands
Designed by Jamb

Countryside Manor, Sussex
Designed by Gunter & Co.

MARBLE

Sourced directly from one of Italy's most prestigious quarries, the marble for Drummonds' counter-tops and shower trays is the finest in the world. Each slab is unique, with veining that takes thousands of years to form. Pre-cut to accommodate our brassware components, the dimensions are fixed. Marble is easy to care for, but the polished surface can be eroded by limescale build-up or exposure to acidic cleaning products.

CLAY

The chinaware for our basins and WC suites is hand-poured from English clay and kiln-fired at the Drummonds' foundry. All ceramic products show slight variations in dimensions, but our craftspeople achieve an unprecedented level of accuracy. Our signature off-white glaze gives a flawless finish that complements any interior. The finished product is highly durable and easy to care for.

IRON

A historic process for which the Drummonds foundry has become world-renowned. Our cast-iron baths are hand-enamelled from the kiln for a perfectly smooth glass-like interior, which is highly durable. The exterior can be left as raw cast-iron, polished to a mirror finish, or painted to complement the surrounding room. For our most luxurious finish, baths can be clad in hammered copper or brass.

BRASS

Cast from pure molten brass using ancient techniques, Drummonds produces taps, showers, vanity stands, towel rails, mirrors, lighting, and accessories. All components can be specified in one of nine house finishes. Brass is a live product and will show natural variations in colour and will deepen to a characterful patina over time, requiring regular polishing to retain its bright finish. Our nickel- and chrome-plated brassware is a lower-maintenance alternative that exhibits fewer variations and less change over time.

Bathtubs

1. CHOOSE THE MODEL

By Base

Skirt

Feet

See page 20 for baths with skirts, 22 for baths with feet.

By Material

Cast Iron

Copper

Stone

Most of the collection is cast iron; see page 24 for copper baths & page 25 for the Coln stone composite bath. Fitted baths are on page 23.

2. SELECT YOUR EXTERIOR FINISH

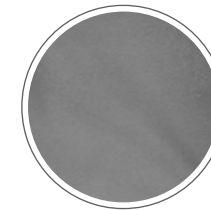

Raw

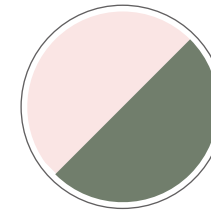

Polished

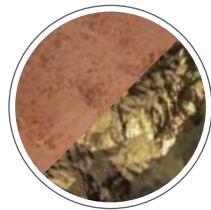

Primed

Painted

Clad

Cast-iron bathtubs have an enamelled interior and are available in any of the above exterior finishes. Copper baths can be polished or painted. Ask Drummonds for more information. See page 24 for clad baths.

3. CONFIGURE OVERFLOW & WASTE SETS

Below the floor waste

Above the floor waste

Plunger overflow & waste

A waste outlet drains water underneath the bath, while an overflow outlet helps prevent water from spilling over the rim. These can be configured in three ways: above the floor, below the floor, or using Drummonds' unique plunger mechanism.

Ask your Drummonds adviser which type of waste would suit your choice of bath, then check with your plumber where your drain will be located and that this installation would work in your room. Baths with feet are generally plumbed above the floor, and our skirted bathtubs (except the Meon) require plumbing below the floor (unless raised on a plinth).

Finally, choose a Push Click Waste or a Plug & Chain, and we will match the finish to your bath taps and mixers. All waste and overflow sets can be found on pages 26-27.

Freestanding Showers

1. BASE STYLES & SIZES

See pages 30 - 31 for showers with feet, 32 - 33 for showers with skirts, 34 - 35 for showers with marble bases.

2. CONFIGURATION

On standard-size showers (Spittal, Test, Medway), the door faces the shower control. For larger models (Severn, Thurso, Mersey) it can be specified to the left or right side of the shower. Hinges on all models can be fitted to open either way. Two bottle racks are included with each freestanding shower.

3. BRASSWARE FINISHES

THE
Mull Collection

Discover the refined elegance of The Mull Collection. These classic cross-head fittings are brought to life through precise lost-wax casting, a method chosen for its ability to capture exquisite detail. Notice the handcrafted quality in the beautiful undulations on each tap head, the distinctive shapes of the spouts, and the unique shields - details impossible to achieve with machine casting. Every part of this range is carefully considered, classic, and timeless, yet built with Drummonds' renowned robust durability.

THE *Coll Collection*

Explore the tactile sophistication of The Coll Collection, also hand-cast in lost-wax. This distinctive range introduces beautifully weighted lever handles, each element carefully considered to elevate the ritual of use. The choice of materials defines the collection: from sleek solid metal to luxurious options like hand-poured earthenware china (in a subtle off-white tone), or richly grained hand-carved walnut. Premium materials meet impeccable craftsmanship, providing a bespoke feel with enduring style.

THE *Chessleton Collection*

Introducing Chessleton, a collection with a distinctly tailored profile and a refined sense of history. Its design is transitional, using lost-wax casting to achieve a beautifully tapered spout with clean, sharp edges that are impossible to machine. This craftsmanship is paired with industrial elegance: robust detailing brings a purposeful, mechanical aesthetic that clearly references the sleek geometry of Art Deco design. Chessleton provides a sharp, enduring statement built with unmatched quality.

THE
Bibury Collection
by Marc Newson

Experience the masterful minimalism of The Bibury Collection, designed by the prolific Marc Newson. Drawing its core inspiration from a fusion of classic forms and a distinctive Soviet spigot, it has a magnetic mid-century nostalgia. Applying his unmistakable design philosophy, Newson has perfected every element: line and plane intersect seamlessly, while forms are simplified to their most essential iteration - immediately iconic and instantly recognisable.

THE
Leawood Collection

by Martin Brudnizki

Experience the inspired design of The Leawood Collection, conceived by the inimitable Martin Brudnizki. Each piece is meticulously hand-cast using the lost-wax process to achieve perfect form. Its aesthetic is defined by contemporary curves - a rounded spout that gracefully tapers - and distinctive paddle-shaped lever handles. These functional handles draw inspiration from robust, industrial spaces, lending the collection a beautifully balanced feel that is both highly practical and impeccably finished.

THE
Bestwood Collection
by Martin Brudnizki

Our second collaboration with Martin Brudnizki, the Bestwood Collection is rooted in the language of industrial design. Available in both lever and cross-head formats, it's defined by a strong, exacting silhouette brought to life through intricate lost-wax casting. This traditional technique delivers beautifully honed simplicity and requires extensive hand-polishing to achieve its commanding, sculptural finish.

THE
*Bestwood X-head
Collection*

by Martin Brudnizki

The Bestwood Collection draws its bold aesthetic from industrial design. It offers maximum versatility with both cross-head and lever handle versions. The look is distinctive and powerful, achieved through meticulous lost-wax casting. This process enables the striking, pared-down yet bold design, while requiring extensive man-hours of polishing to perfect every detail, ensuring a truly exceptional, statement-making finish.

THE
*Hudson X-head
Collection*

by Pembroke & Ives

The Hudson Collection emerges from a dynamic collaboration with New York interior design studio Pembroke & Ives, distilling the essence of contemporary American style. Defined by purposeful geometry and a strong, tactile profile - offered in both lever and cross-head variations - it delivers instant impact. Rich brass detailing and exacting finishes underscore its lasting quality, where British craftsmanship meets American vision.

THE
*Hudson Lever
Collection*

by Pembroke & Ives

Born from a transatlantic collaboration with leading New York design firm Pembroke & Ives, The Hudson Collection pays homage to bold, distinctive American style. Available in both lever and cross-head formats, this collection commands attention with its robust, tactile scale and compelling angled lines. The meticulous detailing and finishing, achieved using a significant amount of solid brass, ensure a substantial and enduring aesthetic; a perfect fusion of refined British craft and visionary American confidence.
