## CLEAN LIVING

Despite being one of the most used rooms in the house, bathrooms are often the most neglected in terms of style. A statement feature is the easiest way to add grandeur to small and humble spaces; Drummonds' cast iron bath is hand-painted with flowers and birds and will make any bathroom sing, while the London Basin Company has a striking collection of exquisite porcelain sinks, any of which will add style to the plainest of spaces. Pair bold statement pieces like these with more muted items in wood and bamboo. To reduce unsightly clutter, display products that are both functional and attractive. Conceal superfluous clutter in a vibrant storage jar, leave your jewellery on a decorative plate, and weigh yourself on bathroom scales that are chic and minimalist.
